

What to do

IF YOU'VE BEEN HACKED

- Unplug your computer.
 - From a different device, change passwords for your accounts.
 - Inform your bank & credit card companies.
 - Don't beat yourself up. It's not your fault.
- Unfortunately, hacking happens to thousands of people in the U.S. every day.
- Take your system to a local, reputable computer repair shop. We're here if you need us.

COVID CONCERNS? REMOTE TECH SERVICES AVAILABLE.
ON-SITE & IN-HOUSE APPOINTMENTS AS NEEDED.
