COMPANY OVERVIEW

DRC Technologies is a premier, certified Information Technology solutions provider based in Northampton, Pennsylvania. Founded in 2002, we deliver **end-to-end technology infrastructure, proactive systems management, and robust security installations** tailored for local, state, and federal government agencies, law enforcement facilities, and commercial operations. We minimize operational downtime and defend critical digital assets through 24/7 system monitoring, advanced threat mitigation, and resilient network engineering.

CORE COMPETENCIES

- **CJIS-Compliant IT Services:** Secure administration, hardware deployment, and engineering tailored explicitly for law enforcement, judicial networks, and emergency dispatch centers.
- **Managed Security & Active Defense:** Deployment of corporate-hosted email filtering, real-time antivirus architecture, structural firewalls, and persistent threat detection systems.
- **Network Infrastructure Services:** Comprehensive blueprinting, legacy line cleanup, low-voltage structured cabling, multi-node routing configuration, and infrastructure monitoring.
- **Physical Security Operations:** Precision configuration, commercial-grade IP security camera system deployment, and specialized ongoing remote diagnostic services.
- **Break-Fix Maintenance & Logistics:** Rapid component-level diagnostics, data sanitization, full server restorations, and life cycle asset configuration management.

PAST PERFORMANCE

- **Law Enforcement & Public Safety Facilities:** Delivered secure technical support, infrastructure maintenance, and specialized systems deployments inside heavily regulated public safety network environments.
- **Commercial Operations & Critical Infrastructure:** Designed and deployed end-to-end network installations and managed service architectures for regional businesses to preserve operational uptime.
- **Public Sector Security Architectures:** Orchestrated multi-site physical security and IP surveillance networks to track, log, and safeguard regional facilities.

DIFFERENTIATORS

100% CJIS Certified Staff

Every technician is strictly Criminal Justice Information Services (CJIS) certified, vetted, and authorized to operate within sensitive law enforcement data facilities under agency compliance protocols.

CMMC Certified Framework

Audited and validated alignment with Department of Defense information security standards, guaranteeing strict compliance while handling sensitive defense supply chain workloads.

24-Year Regional Legacy

Trusted since 2002, combining the rapid agility of a local tactical provider with the elite capability of an enterprise IT engineering firm.

Eco-Secure Asset Lifecycle

Integrated on-site certified electronic waste recycling and secure DoD-compliant hard drive data destruction solutions.
